Authorized as second class mail, Post Office Deputment, Ottawa

in the Legislature

By H. G. HAMMELL, M.L.A.

The second week of the prosent Session of the Alberta Legislature saw continuation of the debate on the Speech from the Throng

Excitement ran high on two or three occasions when members on the government side of the House rose to correct false statements and misrepresentations made by the CCF mem-

The member from Banff-Cochrene had his seat moved to the left of the Speaker during the week at the request of the government members.

Hon. A. J. Hooke, in reporting to the Legislature on thee work in his departments, dan't extensively with the work of the Film Censorship Board. This independent board last year checked over 3,100 picture. They brought about 116 elimina tions (parts of pictures cut out) and refused two pictures, "Allotment Wives" and "Decay". The Act governing consorship of motion pictures has been in effect for 20 years, but there has not been any apparent reason for its rigid enforcement. 35 mm. pictures have always been censored, and most 15 mm films were educational films. What was happening was that when 35mm pictures were censored the same film was being shown in the province in the 16

In dealing with housing Mr. Hooke pointed out material from dismantled military camps was being made available as quickly as possible according to a priority list where government departments came first, municipalities and school divisions second and veterans' and businesses next.

His report showed that fire insurance written by the govern ment had increased 33 percent during the past year and now totalled more than 81 million dollare.

The same steady progress was shown in the life insurance branch.

Hon, C. E. Gerhart, in report ing on the department of muni cipal affairs, told the House the farming population was down 14 percent last year while the provincial population showed a 5 percent increase.

The use of electricity in the province last year was up 25 percent while tax collections generally were very high.

The social service tax, a field which last year netted the government over a million dollars is being returned to the municipal districts. This field may henceforth be used by the municipalities to increase their revenues.

The minister, in dealing with the department of trade and industry gave information which showed a very favorable industrial development and expansion Last year 66 new industries started in the province. This has provided suppopment for

DRUMHELLER Y. P. VISIT CARBON

The United Church Young People's Union was honored by having Miss Ruth Simpson and her group from Drumbeller visit them on Tuesday evening of last, week."

Miss Simpson's group put on the program for the evening. The meeting was opened by the singing of several lively spirituals. These were followed by a panel discussion on the United Church of Canada. The discussion was very ably led by Miss Simpson who together with members of her group gave a very enlightening picture of the way the church is organized. A quis on the material presented concluded the discussion

A short worship service was conducted by a member of the Drumheller group.

After the meeting a delicious lunch was served by the Carbon

Treatment for Gattle Grubs In Good Business

It has been conservatively estimated that the Warble Fly causes an annual loss to cattlemen of \$14,000,000. It is estimated that the loss per anima that has been subjected to Warble damage, when marketed at the stock yards, is about \$5.00 per head. In addition to this there is the loss sustained by dairy herds and other range cattle. All this loss can be prevented if treatment of cattle is started now. The cost is only a few cents per head.

Ninety six percent of Alberta ranchers consider tre tment for cattle grubs just as important as weaning, dehorning and branding. Cattle treatment is an easy and highly profitable practice.

The backs of the cattle must be watched and when the openings or breathing holes of the cattle grub appar, treatment should start, repeated again in three weeks, and then repeat ed again in another three weeks

campaign would do much to wards ridding the district of the pest, provided that all cattle are treated thoroughly. For the treatment of large herds a power sprayer is practicall Small herds can be treated satisfactorily by using a stiff brush and rubbing the solution well in.

TRY A CLASSIFIED

more than 1,000 people and has added much to the total provincial assessment. Thirty six new industries are now making plans to enter the province with many more making enquiries. Twenty seven new co-operative associations were formed last year. The total business done by cooperatives last year exceeded \$104 million.

BARLEY CONTEST RENEWED IN 1947

Continuation of the National Barley Contest in 1947 was announced on behalf of the brewing and malting industries at a meeting of the National Barley and Linseed Flax Committee in Winnipeg.

As in 1946 this year's contest

will carry cash prizes of at least \$25,000 plus allotments of malting barley seed to successful contestants.

The cash awards will again be on a regional, provincial and inter provincial basis, Inter provincial awards for the 1946 con test are still to be made and the winners of the four cash prizes will be announced April 1st at the Manitoba Winter Fair at Brandon

Rules and regulations of the 1947 contest will be substantial ly the same as last year.

Renewal of the contest in 1947 is only part of a more comprehensive plan to try and produce a grade of barley which will give Canadian agriculture the front place it already has in the world of wheat with No. 1 Northern.

CANCOA'S LA

COURSE PLOTTERS

Statistics and reports from other lands are to public health departments what a compass is to a liner at sea. They help indicate the tack which the health conservation services must take to make life more livable and to steer our country clear of plangues and epidemics which may break out abroad.

In Canada, the Dominion bureau of statistics staff works closely with health authorities to ensure initiation of the best measures for protecting the public, and the bureau's reports are invaluable in keeping the advance to higher national health standard on the right course.

SLOW DOWN

The doctors say we must learn to relax. No one can keep in a flurry of excitement and bustle all the time without an eventual "crack up." Drawing on the resources of vitality can harm a person, if it's overdone.

Experts assert that the mod-

crately energetic person, rather than the plunger and pusher, will go further in the long run. He'll have more to draw upon, in reserve. They advise living at a sensible pace, to get the most out of life longest.

Russia plans to nearly double its sugar production next year.

Canada is one of the very few nations lacking a national lib-

"Desire to Serve-plus Ability"

Your RED CROSS help is needed!

In frontier districts of Canada the nearest hospital or doctor may be a hundred miles or more away. Over twenty years ago the Red Cross began establishing outpost hospitals and nursing stations in these remote regions. Today a whole chain of Outpost Hospitals can be found in the frontier districts of the Dominion. They bring medical science within reach of these isolated communities. Hundreds of thousands of patients

JOHN ATKINSON, CAMPAI GN MANAGER, Phone 9

have been treated in these tiny hospitals, including thousands of confinement cases. These hospitals also serve as health centres for their communities, carrying on medical inspection in the schools and organizing clinics for the children. Your help is needed to maintain and expand this vital work. Stand behind the Red Cross, and help bring medical aid to your fellow-Canadians pioneering on Canada's frontiers. Give NOW... give generously.

HEALTH AIDS

Child specialists, admitting that life is tough enough ask parents not to make it hard for youngsters to keep healthy.

For instance, they suggest that mother give the child warm water and soap, while training him to keep clean, see that his tooth brush is handy and that there is a comb readily available to him when he should be using it.

Further, mothers should give the child a place in which to play, and see that he or she has other children to play with, if the offspring is to be permitted to develop the healthful playway. The experts again remind parents that habits are as easy to form as they are difficult to

break.

The Canadian constitution places responsibility for education squarely on the shoulders of the provinces.

Beware

Se NOW

MEANS \$5 LATE

NOW is the time to protect your cattle! Warble-Flies reduce milk production, meat quality, and hide and leather quality. Treatment is easy and effective. It costs about 5c per head and saves \$5.00 per head.

To be effective, treatment must be given during March, April and May. Make sure your cattle are protected. It pays later on -- in cash!

HELPING RED CROSS NATIONAL SERVICE

While still confined to Laurier House with a serious cold that threatened for a time to develop into pneumonia, Prime Minister King prepared a state ment in support of the Canadian Red Cross National Appeal for \$5,000,000 which opened on Monday across Canada.

"In helping to meet a national need through enabling the Canadian Red Cross Society's services to be continued and developed, the citizens of Canada may feel that they are performing a national service," the Prime Minister said.

"I can speak, I know, on behalf of all political parties in Canada in urging support of the work of the society.

"By its appeal for 1947 the society hopes to develop within Canada certain services which, during the years of war, had in some measure to be curtailed. The society seeks to be in a position at all times to provide relief in the event of local disaster.

"As a volunteer body the Canadian Red Cross Society depends upon the voluntary sup port of the people of Canada," Mr. King said.

The canvass opened Monday is for funds for the peacetime work of the Canadian Red Cross The plans require funds for the maintenance and expansion of its extensive peacetime services including a geat new undertaking to make free blood transfusions available in all emergency cases throughout Can-

ALL SHOULD PAY FOR EDUCATION

Everybody gets education, why shouldn't everybody pay for it? By our present obsolete tax system the owners of land and buildings pay 78 percent of the cost of our schools,, and the government pays about 22 percent. There are scores of thousands of people who got almost a free education by this system. They are sending children to school and yet pay little toward the cost.

Since merely to live in an educated community is better than to live in an illiterate one. everybody in Alberta may be said to benefit through public education. So everybody should be required to contribute to its support according to his ability. nybody who can afford to buy luxuries can afford to contribute a fair share to support ed ucation. The way to collect that share from them is through the general taxation on such articles and through the general revenue of the province. The people who pay those taxes will profit in the end because nothing raises the standard of living as much as a highly skilled, intelligent citizenry.

NYLONS FOR MEN

Nylon, the stuff of toothbrushes, parachutes and feminine leg gear, is now going into the manufacture of men's socks

Man in the latost of his poriodic invasions of the feminine world hasn't won outright vict- mending. And it will be just as ors however, for the time buing

The King was in the laundry washing out his shirt, And you bet he got his soap at NASH'S, 4 large bars . . 250 (Wise old Kinkie)

The Queen was in the parlor sweeping up the dirt, And you bet she bought her brooms at NASH'S, 95c to \$1.75 Nash's brooms are so good that with twice the effort they do double the amount of work.

The maid was in the kitchen eating pickles sweet, And the pickles came from NASH'S store, for the King and Queen would have no other.

(Wise old Kinkie and Queenie) And you won't either if you try them just once.

The Blackbirds flocked to Nash's store

To get themselves some meat, Lovely meat that we ourselves sometimes try to eat.
